Division

2019
Product of the Year

The **MGA 1200CS™** system advances the state-of-the-art in process mass spectrometry with the first CyberSecure PLC enabled mass spectrometer. Fusing mass spectrometer technology with Schneider Electric's Modicon X/80 PAC and Magelis HMI, the MGA 1200CS delivers the fastest gas analyzer on the market.

- Superior stability, sensitivity, resolution and ruggedness
- Rapid analysis time – multiple components in 1 second
- Non-scanning - simultaneous analysis from multiple Faraday detectors providing REAL-TIME analysis
- Measures up to 16 components from mid-ppm to 100% for as many as 100 sampling sites
- Optional validation assistance for 21 CFR Part 11 compliance

Contact Process Analyzers for additional information on applications and specification. See the Sales and Service page or contact Process Analyzers about upgrade options for earlier models.
